

## **Installation Guide**

Required equipment:

- a smartphone on which the prototype will be installed and used by the users
- a smartphone or computer with any voice recording software installed
- equipment for filming the test sessions (camera or smartphone etc.)

1. Using your smartphone of choice, open the following link in a web browser:  
<https://framer.com/share/Bottle-ECSE424-Group-11--pnTGuX6zsWPmJxich6KO/znaJ0OOfc>

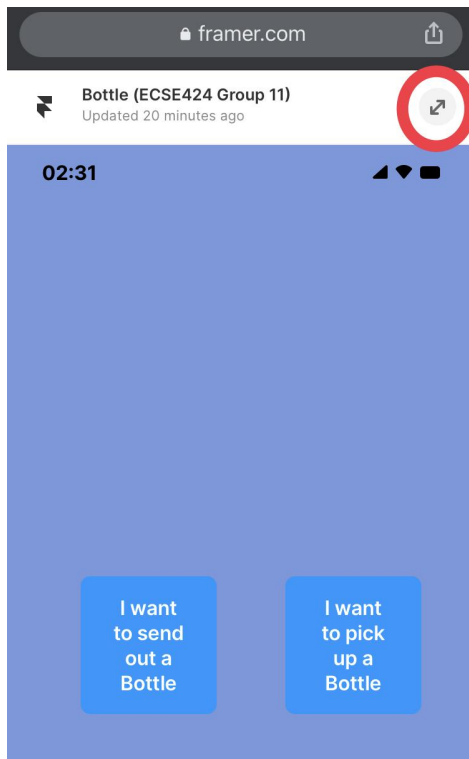

Alternatively, you can open your smartphone's camera application and scan the following QR code. It should open the aforementioned link in your smartphone's web browser.

#### Open on Mobile

Scan with your phone's camera or QR code app to view.

2. Then, press the “enlarge” icon in the top-right of the screen to expand the screen.

3. Done! You can now use the application normally.  
See the manual for more information on how to use the application.
