

User Test Tasks

Here is a list of tasks to complete during the test. Read through all the tasks before beginning and ask questions if you have any. Take as much time as you need.

Please note that each of the tasks listed below are individual tasks and do not depend on each other. That is to say, do not think of them as step 1, step 2, step 3. Once you complete one task, move on to the next one.

Task 1- Send out a message (a Bottle)

Task 2- Begin to send out a message (a Bottle) but discard it before sending it out.

Task 3- Find a message (a Bottle) that fits your mood and listen to it. Then return to the home screen.
