User ID: 01
Date: 07/10/2021
Time: 18:30

Task descriptions	Accomplished	Observations
Record a clip	Yes	User had trouble getting to the recording page. It seems that they didn't understand what the icons on the main page were. Once they arrived at the recording page, they did record a clip, but did not speak while doing, so it was a blank clip.
Listen to a recorded clip before posting	No	
Rerecord a clip	Yes	The user didn't do this in the intended way. After recording a clip, instead of the redo button, they pressed the back button to return to the home page, then came to the recording page to record again.
Discard a clip before posting	Yes	The user managed to do this on accident, by pressing the back button after recording a clip. They did not use the delete button.
Add tags to a recorded clip	No	Once the user had recorded a clip, they pressed the back button (consequently discarding the recording) and never arrived at this page.
Post a recorded clip	No	Once the user had recorded a clip, they pressed the back button (consequently discarding the recording) and never arrived at this page.
Find a clip that has certain tags	Yes	The user had trouble understanding how to get to this page. They selected one tag even though multiple selection was allowed.
Listen to another user's clip	No	The user got confused how to get to this page after choosing a tag. So they decided to press the back button.
Return to the home screen	N/A	For this prototype, this happens automatically once a "Listen" or "Say" task has been completed.
